RECEIVED

MAY 12 1981

UNION

As arranged with Dave Brookman, we are sending via UPS today 37 core drill soil samples taken from the bottom of a storm drainage ditch serving both Montrose and Jones Chemical Co. plant facilities. The samples are marked as follows:

Sample Group 1 - B,C,D,E
2 - A (only)
3 - A,B,C,D,E
6 - A,B,C,D,E
9 - A,B,C,D,E
10 - A,B,C,D,E
11 - B,C,D
13 - B,C,D
15 - A (only)
16 - A,B,C,D,E

Duplicate samples were also taken by the California Department of Health Services, Hazardous Material Management Section for analyses. A third set of samples was taken by Jones Chemical for analyses by Smith Emory Laboratory in Los Angeles.

As of now, we were informed by the State that the samples will be analyzed for:

pH
Alkalinity
DDT
Monochlorobenzene (MCB)

We request, therefore, that the same analyses be made on the samples submitted by Montrose.

Thank you for your assistance in this project.
